

Essex Modular Cab Enclosure: 3000 & 4000 Mules [Non-Trans]

The Essex Modular Cab system is designed to fit and enhance the Mule with its unique features, quality and ease of installation. The modular components provide for flexible configurations and future upgrades. This allows you to outfit your unit to meet your current needs and budget and protects your investment when you add on.

Unique, Glass Lift Windshield and Lift-off front hinged Steel or Fabric doors.

Rear Glass window opens for circulation.
4000 Hood opens to access storage

Lightweight Fabric covered doors fit all cabs. They feature a large zippered top window

All Cabs include: Dome light, An accessory wiring harness with fuse panel; and an electric windshield wiper.

The Essex Hardtop, Safety Glass Lift Windshields and Extended floorboards are the foundation for the modular cab system. These standalone components enhance the Mule with their unique features, user protection and convenience.

The addition of a rear sliding glass window and rear quarter panels add further protection while maintaining full visibility. The windshield system is mounted onto the roll cage for safety even in the most rugged off-road environments. The 4000 Model lower windshield panel attaches to the upper windshield and flips open for access to the front storage compartment.

Our trademark Lift Windshield and Sliding Glass Rear window provide excellent visibility and flow thru ventilation. Together with the lift off doors, they provide 4-way circulation that makes an Essex cab practical even in hot summer and southern climates.

The cabs are constructed of 16 & 18 gauge rust inhibited 'Electro-galv' steel with a durable powder coat finish matched to the red, green or Black Mule finish. The frame is reinforced for strength and formed for a tight, easy installation with a minimum of fasteners. It includes a preinstalled dome light, an electric wiper and an accessory harness for easy installation of electrical accessories.

Add your choice of either steel with sliding glass windows or fabric covered doors with zippered vinyl windows and your Mule has the best cab available. Both the fabric and steel doors are constructed over the same strong steel frame. They feature lift-off hinges for easy door removal and quality recessed paddle latches with locks. The 4000 Series doors are 3" wider for easier access. The fabric covered doors feature a large top window with zippers to allow full air flow. Door limit straps are included.

Add the Cab Accessory Package and a Heater to complete your outfit.
