

Essex SureFoot Tires

Over 25,000 tires in service over the last eight years, Essex SureFoot's stand alone in the heavy UTV industry. Load Ratings over 1100 Pounds as well as Run-Flat Performance, Reinforced Sidewalls, Tough "Stubbleguard" Rubber, Kevlar Belting, and Puncture Resistance have set our tires apart from the rest.

"This is the best mud tire we've ever tested" - ATV Illustrated

Run-Flat Performance

With Essex SureFoot Tires you're in for a whole new ride!

Enhance the off-road capability of the ATV or Utility Quad with the strength and long-wear durability of our Tires.

Today's bigger 4 wheelers and Utility Vehicles require tires that carry more load and resist punctures better. Typical ATV tires are low pressure balloon tires with soft sidewalls for comfortable riding. They need to be overinflated, aren't stable on side hills, and are more vulnerable to puncture with heavy weight loads. We have designed tires especially for these increased loads. With Reinforced Sidewall Stability and Kevlar-Belted Run-Flat Puncture Protection....Essex's "Surefoot" brand is made specifically for today's heavily laden Utility Quads and dressed 500+cc ATV's - to Take you where you want to go; and *Bring you Back...*

Three sizes of our SureFoot Tires are available:

489XT Pattern: 26"

589MT Pattern: 25" & 27"

Testimonial

"I got the lift kit and tires on my Mule and am very satisfied with your product. I am absolutely amazed at the difference in the machine. I mentioned to you how disappointed I was with the 2wd Mule. Any kind of mud or wet up-hills and I would stick it right now. You said that 4wd wasn't really necessary but I thought perhaps that was just a bit of salesmanship. Went out yesterday for the first time after the kit was on just to see. We have had a bit of rain lately and it is pretty muddy. Went to the place where I usually get stuck the easiest and went thru without a problem. Then spent the next hour looking for the steepest, muddiest stuff I have and I never could get stuck. On the really steep stuff I used the diff lock and I never even broke thru the grass. Went places that I would never try my 4wd tractor even when it is dry. I am very, very pleased with the result. Totally different machine. My kids say it looks cool too. Thanks again for your product. I really like what it has done to the Mule."

BIGFOOT KITS AND REPLACEMENT TIRES

THIS IS NOT ANOTHER ATV BALLOON TIRE! WITH OUR KEVLAR-BELTED, RUN-FLAT TECHNOLOGY, STUBBLEGUARD RUBBER, AND REINFORCED SIDEWALLS, SURE-FOOT TIRES WILL ADD DEPENDABILITY, GROUND CLEARANCE, IMPROVED TRACTION, AND LATERAL STABILITY ALLOWING YOU TO TAKE ON RUGGED TERRAIN THAT STOPPED YOU BEFORE.

Sizes & Details

Essex 25" & 27" SureFoot Tires (589MT Tread)

This 6-ply tire has been designed and tested for heavy utility vehicles (25" recommended for ATV's) like the Kawasaki Mule, Kubota RTV900, and others. It features Kevlar Belting, Puncture Resistance, tough "Stubbleguard" Rubber, Reinforced Sidewalls, Run-Flat Performance, a load rating of 1190 pounds (1125 lbs for the 25"), and 1 1/8" lugs that eat up terrain, but run fairly smoothly on hard surfaces. Not recommended for extensive use on pavement or in powder sand conditions. Essex Lift Kit included, specify if you have extra weight on your vehicle from a cab, plow, etc.

Essex 26" SureFoot Tires (489XT Tread)

For general use with mixed on and off-road travel, choose our 26" SureFoot Tire. This 6-ply 26-10-12 tire mounted on all four wheels is patterned after the popular 489XT tread style with its medium sized 5/8" lugs. Like the 27", it features Kevlar Belting, Puncture Resistance, tough "Stubbleguard" Rubber, Reinforced Sidewalls, and Run-Flat Performance. This tire offers a load rating of 1150 pounds, a smooth ride, and medium traction performance. Essex Lift Kit included, specify if you have extra weight on your vehicle from a cab, plow, etc.

Essex 25" SureFoot Tires (589MT Tread)

Essex has now developed 25" SureFoot Tires that fit on OEM 12" wheels in order to offer the SureFoot Technology to a wider range of vehicle users. It's a lighter tire that offers the same great features as the 27" (with an 1125lb load rating), but are best suited to ATV's, Mini-Trucks, Side X Sides, and other less load bearing applications.

We also carry OEM Takeoff tires and rims, mounted and unused

Additional Tires

Titan Multitrac Tires

The 26-12-12 Multitrac on front & rear is our preferred 6-ply commercial Turf tire that provides an excellent ride. It's comfortable and long-lasting, is more stable than the hard surface Radial Tire, and has a lighter footprint on turf, it's the best solution for street and turf use.

Steel Belted Radial Tire Kit

As an alternative to our Multitrac, This high mileage street tire kit is mounted on 14" steel rims. We use 195-65-14 All Season Radials, 4-ply rated. The 8" wide tire offers long wear life. It's a good economical choice for pavement use.

Essex Lift Kit

With over 10 years and 12,000 proven Lift Kits, Essex has set the standard in UTV suspension enhancement. Essex's 40-90% stronger Replacement Springs keep the nose of your vehicle up and improves the ride and handling. Together the Springs, Lift Blocks, and extended Rear Shackles provide 2 inches of additional clearance and accommodates oversize tires. The easy to install kit retains the full movement of the strut and does not alter the camber angle. Depending on your situation and vehicle, our Lift Kit may or may not be required.

Wheels

We have several wheel types available:
Modular ITP Steel Wheels
C7 ITP Aluminum Wheels Limited
C4 ITP Aluminum Wheels
ITP SS Alloy
