ESSEX CAB ENCLOSURE FOR THE 3010 & 4010 TRANS MULES™

The Cab enclosure for the Trans Mule is an extension of the Essex 4000 Cab with its unique Lift Glass Windshield system and Lift-off Doors

The cab is fabricated of 16 & 18 gauge rust inhibited 'Electro-galv' steel with a durable powder coat finish matched to the red or green Mule finish. The frame is reinforced for strength and formed for a tight, easy installation.

The cab includes a preinstalled dome light, an electric wiper and an accessory harness for easy installation of electrical accessories.

The front section of the Steel hardtop is the same as Essex standard hardtop; the rear section is mounted with slides that allow it to cover the back seat or to be shortened to allow the full sized bed to be raised. Well secured, it can be trailered in either position.

Our trademark Lift Windshield provides excellent visibility and flow thru ventilation. Together with the lift off doors with their large zippered widows, they provide 4-way circulation that makes an Essex cab practical even in hot summer and southern climates.

The Extended Floorboards expand the floor inside the cab, reduce dust and mud splatter, Protect the door bottoms and make it easier to enter and exit the cab.

The front compartment features a rollup clear plastic rear window and the backseat Rear Closeout Panel fits from the back of the hardtop down to the bed and out to the side roll bars as shown.

The Steel Doors with Sliding Glass Window or Black Vinyl or Camo Fabric covered doors fit the front and back seats.

Both Vinyl doors feature a zippered top window for lots of fresh air when desired. All doors lift off easily from their brass pin hinges. The top quality recessed paddle latches lock securely and are flush with the doors. Underseat closeouts for the engine compartment help reduce engine sound, cold air and dust.

The Essex cab is designed to accommodate our numerous safety and comfort accessories: fans, rearview & external breakaway mirrors, visor and bed lights, in-profile turnsignals, CD Stereos...and more.

ESSEX STEEL HARDTOP FOR THE TRANS MULES

3000 & 4000HTrans in Green, Red, Camo or Textured Black

This hardtop is part of a modular cab for the Trans Mule. The other parts can be ordered separately to upgrade to the full 4 Door cab:

- 3000 & 4000WLT: Glass Lift Windshield & Front Qtr. panels,
- Trans Upgd: Rear Quarters, Extended Floorboards, Clear Vinyl Sides and Rear Window Behind Front seat & Rear closeout behind the second seat
- Vinyl Doors with large zippered windows, Front & Rear Seats.
- Fused Accessory Harness and Domelight included

The Essex Hardtop is made from rust-inhibited steel and finished with matching OEM powder-coat paint. Secured with steel brackets, it is safe to trailer at normal speeds.

The rear section slides and locks into either the full length 4 seat or full sized bed mode.

The detachable visor provides a mount for a light bar and or turn signals that are within the profile of the vehicle.

The four circuit wiring harness makes it simple to install electrical appliances such as: windshield wiper, cooling fan, Stereos, bed lights and axillary power ports.

Compatible with our Snap-on Plastic & Lift Glass Windshields or; add our cab's unique Glass Lift Windshield and grow it into a fully enclosed cab
